

Adding Bookmarks to Video Evidence

Bookmarking allows a party submitting video evidence to add a bookmark(s) to direct the arbitrator to a specific location in the video where the accident/loss occurs. If the video is lengthy and cannot be edited, this feature is helpful, as it eliminates the need for the arbitrator to view the entire video.

To add a bookmark:

1. Attach the video evidence to the TRS filing, where applicable (i.e., Liability Arguments, Damages), and double-click the "video" icon.

Attache	+ Att	+ Attach Evidence		
View	ID	Evidence Types (show description)	Pages	Detach
		Video Evidence		<u>\$</u> 5

2. Click on the green "Add Bookmark" icon.

View Evidence

3. Slide the "bookmarks" to the specific start and end points, name the bookmark, and click "Save."

▶ 00:20		-			00:09	()	8	
Add your bookmark								
✓ Name Impac	ct		Save	Cancel				

4. The added bookmark can be edited or deleted, if needed.
